

Congratulations, you have obtained the healthiest bunk bed in Australia.

The team at Organature wishes your child the very best sleep and peaceful nights for you.

To assemble your new bunk bed, please find the four corner posts marked –

LF (left front)

RF (right front)

LR (left rear)

RR (right rear)

Assembling the ends first, please match the letters/numbers of the horizontal pieces to the vertical posts, using 40mm bolts & key provided.

Once you have both ends assembled, assemble the heavier slat support beams to the end pieces using the bolts provided, making sure that the beams are the correct way up.

As you can see the beams are made of two pieces of timber - glued and nailed together. The correct way up is for the smaller piece of timber to be inset enough so the slats will drop in and sit flush.

The last step to assemble your bunk bed is to secure the slats. Of the 6 sets of slats provided, there are 2 sets that have been pre-drilled and require screwing into place using a No. 2 Phillips-head screwdriver (your screws have been supplied in the box of bolts). These 2 sets belong in the centre of both the upper & lower bed bases. They are numbered, and should be placed with the corresponding number found on the bunk bed frame. Once the centre slats are secured, place the other 4 sets of slats in position.

Enjoy your bunk bed, and sweet dreams! The Organature team
